

# CHRISTOPHER HILDEBRANDT

FUTURE DEVELOPER  
CURRENT STUDENT

## PROFESSIONAL PROFILE

Self studies on the likes of udemy.com, coursera.com and lynda I have been exposed to many areas of the developer world. In that regard,

I believe I have made the right choice by enrolling in the GenTech BootCamp at Coder Academy (Brisbane). Included in the course is a cadetship in which I will get real-world experience as a Developer.

Entering this environment at the ripe age of 28 isn't a hindrance. My working life includes experiences, problems, chaos and finally triumphs the younger applicants couldn't begin to feel the pressure and struggle of.
